

A Walmart Receipt

The table below lists the prices of 10 identical items at Walmart in August, 2019 and December, 2024.

- 1) Calculate the percentage change in the price of each item from 2019 to 2024. Round your answers to the nearest 1/10th percent. $4.92 - 2.67 = 2.25$ $2.25 / 2.67 = .8426 = 84.3\%$
- 2) Add the total cost each year and calculate the percentage change.

Walmart Item	August, 2019	December, 2024	% Change
A Dozen Eggs	\$ 2.67	\$ 4.92	84.3%
Ground Beef (1 lb. Chuck)	\$ 4.12	\$ 5.33
